JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

CUBA.

Report from Cienfuegos—Inspection and fumigation of vessels—Leprosy case—Sanitary improvements in city begun—Mosquito campaign continues.

Acting Assistant Surgeon Villoldo in temporary charge reports, August 17 and 24:

Week ended August 15:

Bills of health issued	2
Vessel inspected and fumigated prior to departure	1
Vessel not inspected	1
Members of crew inspected	37
Members of crew not inspected	26

During the week the local health authorities have reported 1 case of leprosy and measures are being taken to remove it to the leper hospital at Santa Clara.

All preliminary steps leading to the construction of the aqueduct sewer system and paving of the town have been completed and work is expected to begin inside of a few days, to be completed in two years.

The sanitary condition of the town is fair, and the campaign against mosquitoes is carried on energetically.

Week ended August 22:

Bills of health issued	2
Vessels inspected and fumigated prior to sailing	2
Members of crews inspected	81
Certificate of immunity to yellow fever issued	1
Certificate for passengers bound for New York	1

No quarantinable diseases were reported during the week, and health conditions are good.

Reports from Habana—Inspection and fumigation of vessels—House and water-deposit inspection—Mosquitoes abundant—Quarantine against Daiquiri raised.

Passed Assistant Surgeon Amesse reports:

Week ended August 22:

Vessels inspected	10
Bills of health issued	16
Members of crews of outgoing vessels inspected	886
Passengers of outgoing vessels inspected	520
Certificates issued to passengers bound for New York	149
Certificates issued to passengers bound for Southern ports	275
Certificates of immunity to yellow fever issued	30
Vessel fumigated prior to sailing	1

In maintaining the high standard of sanitation established in Habana, the local health officer reports 10,903 house inspections for the week. Mosquito larvæ were found on 23 premises, 16 of these deposits being larvæ of *Stegomyia calopus*.

No further cases of yellow fever have been reported in the island. Heavy rainfalls have been noted in all the provinces, and mosquitoes are abundant throughout the interior.

August 28: Quarantine against Daiquiri raised yesterday.
